

Do you struggle with **SCIATICA?**

If you have pain in your lower back or hip that radiates behind your thigh and into your leg, you may have *sciatica* – a painful condition that affects millions of Americans each year.

Right now, doctors at our practice are conducting a new research study for sciatica sufferers. The study is for an investigational treatment designed to relieve sciatica pain. It involves a single injection that does not contain steroids or opioids.

SELECTED ELIGIBILITY CRITERIA

- ✓ Age 18 - 70
- ✓ Have suffered from radiating leg pain (sciatica) for at least the past 8 weeks
- ✓ Have not had surgery on your lower spine
- ✓ Have not had any epidural injections for your pain within the past 8 weeks
